

# Carino 09

*The power and precision of a high-pressure metering  
with dual drives, high chemical resistance  
and universal application*

Metering pumps – exactly matching your needs

- Nano metering pump up to 5 ml/min and 750 bar
  - Micro metering pump up to 10 ml/min and 600 bar
  - Prep.-metering pump up to 40 ml/min and 300 bar

Carino-09 high-pressure pumps are specialized, highly accurate piston pumps for the analytical and preparative applications and HPLC-technique, but also Micro-and Nano metering pumps in low and high pressure applications for laboratory, research and development and process optimization.

They are characterized by their versatile material equipment, their **dual drive technology** with two independently working metering pistons and their flexible software.

Available with **3 pump head sizes** of 1 ml / min up to 50 ml / min and 3 pressure versions of 150 up to 750 bar.

With **easy operation** via touch panel and TFT color screen, direct entry of dosing parameters, menu selection, purge and setup functions.

Application-specific materials with **stainless steel-, Hastelloy-, Titanium- and PEEK pump heads**.

With **titanium pump head and ceramic sensor** for inert applications with maximum biocompatibility.

In **1- or 2- pump head design** for pulse-free or dual metering in filling-reaction or other high-pressure processes.

With **working and auxiliary piston** used for all analytical and HPLC applications.

With **piston back flushing** to avoid solid deposits and piston wear.

**Integrated pressure control** with programmable pressure Pmin and Pmax.

Process- and automation capable control and flexible integration capability with **extensive connectivity options**.

- High pressure pumps for analytical and HPLC technique
- High pressure pumps for R & D in laboratory and process technology
- Dual high-pressure pumps for two independent fluids
- Dual high-pressure pumps in Master-/Slave-Control
- Pneumatic high-pressure metering pumps
- Heated and cooled metering pumps
- Mixing pumps/-chambers
- OEM designs according to customer requirement
- Nano metering pump
- Dispensers and diluters
- Degasser
- Flowmeter
- High-and low-pressure valve actuators
- Multichannel- / distribution valves
- Autosampler

# Specification: High pressure pumps

## Carino 09EK

*Dosing pump with one pump head (with or without pressure sensor) for filling or Conti-metering in an autoclave, reactor or high-pressure process.*

1-piston design

Pump version construction	2-150	2-400	5-750	5-150	5-400	5-600	20-100	20-200	20-300
	Nano metering pump			Micro metering pump			Prep.-metering pump

### technical design for all pumps images this double page:

max. fluid temperature (°C/°F)	60°C/140°F
ambient temperature (°C/F)	40°C/104°F
flow rate accuracy (%)	< 1% (0,5 ml/min and 12 MPa)
repeat accuracy (%)	< 0,3% (0,5 ml/min and 12 MPa)
pulsation (%)	frequency dependent, < 0,5% (0,5ml/min u. 12 MPa)
material pump head	Stainless steel, Hastelloy, titanium, PEEK
material piston	sapphire
material valves	balls -> ruby; holder -> sapphire; casing -> PEEK
pressure sensor	with and without pressure sensor
input voltage (V)	85-260 V
power consumption (W)	50
safety class	IP 30
control	RS 232, LAN, USB, analogue control 0-10 V / 4-20 mA, start/stop
max. dimensions (L x W x H) (mm)	250x260x100
weight (kg)	3 - 5

# Pulse-free metering pumps

## Carino 09 HK-PF

*Pulse-free metering pump with working- / auxiliary piston for all analytical and HPLC applications and for pulsefree dosing processes.*

pulse-free  
HPLC-pump

Pump version construction	2-150	2-400	2-750	5-150	5-400	5-600	20-100	20-200	20-300
